

HMEA Example - ReadMe File

Files for the example analysis

HMAT – Backlog – R1.xlsm HMAT file for No Backlog scenario for Region R1

HMAT – Backlog – R2.xlsm HMAT file for No Backlog scenario for Region R2

HMAT – Current Budget – R1.xlsm HMAT file for Current Budget scenario for Region R1

HMAT – Current Budget – R2.xlsm HMAT file for Current Budget scenario for Region R2

HMEA – Backlog Example.xlsm HMEA file for No Backlog scenario

HMEA – Current Budget Example.xlsm HMEA file for Current Budget scenario

HMEA Collator – Example.xlsm HMEA Collator file to compare the Current Budget and No Backlog scenarios

Loading the example analysis files

Put **HMAT – Backlog – R1.xlsm** and **HMAT – Backlog – R2.xlsm** into their own folder (i.e. the only 2 files in the folder)

Put **HMAT – Current Budget – R1.xlsm** and **HMAT – Current Budget – R2.xlsm** into their own folder (i.e. the only 2 files in the folder)

Put **HMEA – Backlog Example.xlsm** and **HMEA – Current Budget Example.xlsm** into a folder (i.e. the only 2 files in the folder)

HMEA Collator.xlsm should be in the folder containing the folders for the HMAT and HMEA files

This arrangement will enable the HMEA Example analysis to be run easily.
